Mock Internal Knowledge Base Article Set

LC 4 - synthetic training references

VERSION	DATE	AUDIENCE
v1.0	2026-09-01	Learner-facing reference

Training status: All articles below are synthetic and exist only to support Component 3 verification. They must not be treated as live organizational policy.

KB-410 - Privacy-Aware External File Sharing

v1.0 / 2026-09-01

- Approved pattern: use authenticated recipient-specific sharing for external collaboration when the request and tenant policy permit it.
- Do not use anonymous or Anyone links for this scenario.
- The clinician remains responsible for confirming the recipient and final disclosure decision.
- Tier 1 may explain Manage Access and document evidence but must escalate when a policy or authorization change is required.

Verification use: Cite the specific article and bullet/section when a Copilot output contains a policy or workflow statement.

KB-422 - Curbside Consult Communication Norms

v1.0 / 2026-09-01

- Use the supplied consultation purpose and source facts only.
- Keep the administrative introduction concise and avoid unnecessary clinical detail.
- Use the partner clinician's authenticated identity from the approved request; do not invent a recipient.
- Final message review and send remain with the clinician.

Verification use: Cite the specific article and bullet/section when a Copilot output contains a policy or workflow statement.

KB-431 - Microsoft 365 Copilot - Approved Use Cases

v1.0 / 2026-09-01

- Approved for this exercise: administrative drafting from supplied synthetic notes or facts.
- Not approved: diagnosis, clinical decision-making, interpretation of patient data, recipient authorization decisions, or sending on the clinician's behalf.
- Generated drafts require human review against the source facts before use.
- Workflow or policy statements in generated output should be checked against the applicable KB article before being presented as guidance.

Verification use: Cite the specific article and bullet/section when a Copilot output contains a policy or workflow statement.
