EDITABLE LEARNER TEMPLATE

Case Report Template

LC 5 project | Six required sections in the locked order shown below

SUBMISSION Complete every field that applies. Replace bracketed prompts, attach only approved redacted exhibits, and export the final document to PDF.

Case metadata

Field	Learner entry
Ticket number	[Enter ticket number]
Learner	[Enter learner name or learner ID]
Report timestamp and time zone	[MM/DD/YYYY HH:MM TZ]
SOP/runbook versions used	[List exact titles and versions]
Evidence exhibits	[List redacted exhibit identifiers]

1. Component 1 - Cybersecurity Containment

Required field	Learner entry
Threat category	[Name the category]
Signal 1	[Ticket fact + evidence reference]
Signal 2	[Ticket fact + evidence reference]
Authorized containment action	[Action, actor, exact timestamp, SOP criterion]
Evidence preserved	[Items, location, integrity note]
SOC escalation	[Warm-transfer ID and timestamp]
Unresolved questions	[Do not infer]

2. Component 2 - Cloud Security Verification

Check	Pre-incident state	Observed state	Outcome	Evidence / routing
Sign-in / policy	[Enter]	[Enter]	[Pass / Fail / Review]	[Evidence + team]

Check	Pre-incident state	Observed state	Outcome	Evidence / routing
MFA / authentication methods	[Enter]	[Enter]	[Pass / Fail / Review]	[Evidence + team]
Audit visibility	[Enter]	[Enter]	[Pass / Fail / Review]	[Evidence + team]

Cloud-security warm-transfer reference(s): [Enter ID, destination, timestamp, or 'not triggered' with evidence].

3. Component 3 - Data Security Audit

Aspect	Control examined	Outcome	Evidence	Routing
Storing	Encryption and approved location	[Pass / Fail / Review]	[Enter]	[Team or not triggered]
Sharing	Link scope and external sharing	[Pass / Fail / Review]	[Enter]	[Team or not triggered]
Accessing	Permissions and audit events	[Pass / Fail / Review]	[Enter]	[Team or not triggered]

4. Component 4 - PHI Redaction

Artifact ID	Original data types	Substitutions / removals	Hidden-data checks	Final outcome
[A-01]	[Name, MRN, DOB, provider identifier, other]	[Document each action]	[Filename / metadata / alt text / hidden text]	[Clean / another pass]
[A-02]	[Enter]	[Enter]	[Enter]	[Enter]
[Add rows]				

IMPORTANT Incident-record redaction is an internal minimum-necessary control. Do not claim that an artifact is HIPAA de-identified unless the organization's approved de-identification method has been applied and validated.

5. Component 5 - HIPAA Follow-and-Escalate

Required field	Learner entry
Checklist version and completion time	[Enter]
Applicable SOP/runbook criterion	[Exact identifier and threshold]
Documented facts supporting routing	[Cite Components 1-4]

Required field	Learner entry
SOP-fit result	[Fits approved Tier 1 runbook / escalation required]
Unresolved privacy question	[State without deciding]
Privacy/compliance warm-transfer	[ID, timestamp, destination]
Prohibited determinations check	[No breach, notification, or actual-access conclusion made]

6. Case Summary

Incident facts: [Summarize only established facts in 100-150 words].

Containment and evidence status: [Summarize authorized actions and preserved evidence].

Escalations and owners: [List each triggered transfer and current owner].

Open questions and next checkpoint: [List unresolved questions, without conclusions].

Final submission check

- All six sections are present in this order.
- Every finding cites a ticket fact or evidence exhibit.
- Every triggered escalation uses the approved team and channel.
- No patient or workforce identifier remains in visible or hidden content.
- No autonomous breach, notification, or actual-access determination appears.
- The exported PDF was opened and visually checked before submission.
