LEARNER ATTACHMENT

Escalation Team Reference

Contoso Health training simulation | Exact receiving functions and triggers | Version 1.0

APPROVED CHANNEL Create or update a restricted ServiceNow security/privacy incident task and reference evidence by ID. Do not use ordinary email or chat for PHI-bearing evidence.

Receiving function	Trigger	Action request	Tier 1 must not
Contoso Health Security Operations Center (SOC)	Phishing, risky sign-in, suspected credential/session compromise, malware	Triage, investigate, determine containment scope, correlate Defender/Entra signals	Perform forensics or classify severity autonomously
Identity & Access Management Operations	Authentication-method, account, group, Conditional Access, or identity-configuration remediation	Execute authorized account/session/policy remediation and confirm result	Change configuration outside approved authority
M365 Purview Audit Administration	Audit-role drift, audit search/availability, retention, or licensing issue	Restore authorized audit access or provide scoped audit evidence	Request broad Global Administrator access
Information Governance	Sharing-link, guest-access, permissions, retention, classification, or data-governance finding	Assess governance baseline and authorize remediation	Change sharing or permissions autonomously
HIPAA Privacy & Compliance Office	Possible impermissible use/disclosure, possible ePHI impact, or PRIV-01 trigger	Determine privacy implications, risk-assessment path, and notification obligations	State that a breach occurred/did not occur

Required transfer fields

- Exact timestamp and time zone; ticket number; anonymized description; evidence IDs; actions completed; specific action requested; unresolved question.
- Acknowledgment timestamp and new owner/queue.
- Minimum-necessary content and approved evidence location.

Microsoft least-privilege alignment

Task	Relevant least-privilege role family
Read Entra sign-in and audit logs	Reports Reader or Security Reader, as documented by Microsoft
Manage individual authentication methods	Authentication Administrator; Privileged Authentication Administrator where required
Manage authentication-method policy	Authentication Policy Administrator
Manage Conditional Access	Conditional Access Administrator or assigned security role

Task	Relevant least-privilege role family
Search Microsoft Purview audit	Audit Logs or View-Only Audit Logs through an approved Purview role group
