Ticket 2 Resolution—INC-00472

Data Privacy/Urgent Escalation—PHI in a Public Teams Channel

Use this document: Complete all six sections in order. Use exact timestamps where known, role labels in escalation contexts, and do not reproduce patient identifiers, MRNs, DOBs, or verbatim chart content. This template documents Tier 1 actions only; it is not a breach-determination form.

Ticket Number	INC-00472
Priority	Urgent
Incident Time	10:47 AM
Ticket Opened	10:48 AM
Assigned To	Tier 1 Support Technician
Current Status	Escalated to Compliance Officer—pending determination

SECTION 1—Immediate Containment | Document actions and evidence-preservation status

Deletion status	☒ Confirmed no longer visible ☐ Unable to confirm
Deletion confirmation time	Deleted by the Attending Physician at approximately 10:47:30 AM; Tier 1 confirmed the message is no longer visible in the channel at 10:49 AM
Evidence-preservation time	10:51 AM — Teams audit log for clinic-announcements verified intact and unmodified (view-only check; nothing exported)
Confirmed interaction evidence	At least three recorded reactions; total viewership unknown
Out-of-scope actions avoided	☒ No member outreach ☒ No content recovery ☒ No purge/retention changes

Containment notes

Timeline: 10:47 AM message posted to clinic-announcements (500+ members). Approximately 10:47:30 AM message deleted by the Attending Physician. 10:48 AM call received on the support line and INC-00472 assigned at Urgent priority; the Attending Physician was asked not to re-open, re-paste, or describe the content. 10:49 AM Tier 1 confirmed the message is no longer visible in the channel.

10:51 AM Tier 1 confirmed, view-only, that the Teams audit log for the channel is intact and has not been modified; no purge, retention, export, or content-recovery action was taken. Exposure scope recorded as at least three emoji reactions before deletion, as reported by the Attending Physician; total viewership is unknown and is left for the authorized function to establish. No channel members were contacted and no channel lock or membership change was made.

SECTION 2—PHI-Safe Incident Documentation | Describe by incident type and artifact, not clinical content

Patient reference	Patient A
Provider reference	Attending Physician
Affected channel	clinic-announcements
Incident type	Suspected PHI exposure in Teams channel

Anonymized incident description

At 10:47 AM the Attending Physician, intending to post a schedule-change notice, pasted clipboard content into the clinic-announcements Teams channel (500+ members across the outpatient clinics). The content was what appeared to be a patient chart note excerpt relating to Patient A.

The Attending Physician noticed within approximately 30 seconds and deleted the message at approximately 10:47:30 AM. At least three reactions were recorded on the message before deletion. She reported the incident to the support line at 10:48 AM.

The content was not viewed, retrieved, quoted, or summarized by Tier 1 and is not reproduced anywhere in this record. Only role labels are used: Patient A and Attending Physician.

☒ No patient name, MRN, DOB, or verbatim chart-note content appears in this section.

☒ No unsupported inference is made about who viewed the message.

SECTION 3—HIPAA/PHI Incident Response Checklist Outcome | Record the checklist result before escalation

Checklist reviewed at	Started 10:53 AM; completed and outcome recorded 10:56 AM, before the warm-transfer summary was produced
SOP-fit assessment	☐ Within documented Tier 1 SOP ☒ Outside documented Tier 1 SOP
Escalation required	☒ Yes—designated privacy/compliance function
Checklist outcome	Suspected PHI disclosure requires formal privacy/compliance assessment

Checklist notes/unresolved ambiguities

Outcome statement: INC-00472 is outside documented Tier 1 SOPs — a suspected unauthorized PHI disclosure via a general communication channel — and requires immediate Compliance Officer warm-transfer. All items in checklist sections A–E were confirmed; the completed checklist is attached.

Unresolved ambiguities left for Compliance Officer judgment, with no Tier 1 opinion given: (1) breach status determination; (2) patient notification requirements; (3) channel lockdown decision. Total viewership is also unknown.

SECTION 4—Warm-Transfer Summary Reference | Reference the separate completed standard warm-transfer summary

Receiving function	Compliance Officer (Designated Privacy/Compliance Function)
Warm-transfer initiated	10:58 AM — warm-transfer summary sent to the Compliance Officer
Approved escalation channel	Compliance Officer urgent escalation queue (approved escalation channel); no chart content in the subject line, body, or any chat message
Summary reference/attachment	Provided with this record as the separate section “Warm-Transfer Summary—INC-00472”
Action requested	Formal breach risk assessment and determination of required next steps

SECTION 5—Clinician Communication Log | Document the scope-appropriate update

Communication time	Call received 10:48 AM; scope-appropriate update given 11:00 AM on the same call; call ended 11:02 AM
Clinician role	Attending Physician
Containment update given	☒ Yes
Escalation/follow-up explained	☒ Yes
No breach or disciplinary opinion given	☒ Confirmed

Communication summary

11:00 AM, by phone: thanked the Attending Physician for reporting immediately; confirmed that immediate containment steps are complete (message no longer visible in the channel, audit evidence preserved) and that a warm-transfer to the Compliance Officer is in progress under INC-00472. Advised that the Compliance Officer will follow up with her directly, and that in the meantime she does not need to contact channel members, re-post the content, or take further action in the channel.

No opinion was offered on breach status, disciplinary outcomes, or organizational response, and no promises were made about outcomes; questions about what happens next were referred to the Compliance Officer. Full log attached (INC-00472_Clinician_Communication_Log).

SECTION 6—Ticket Status and Open Items | Close the Tier 1 portion without making the compliance determination

Ticket status	Escalated to Compliance Officer (designated privacy/compliance function)—pending determination
Open items/next owner	Compliance Officer: breach status determination, patient notification requirements, channel lockdown decision, and direct follow-up with the Attending Physician
Final Tier 1 timestamp	11:04 AM
Evidence preserved	☒ Confirmed
PHI-safe documentation review	☒ Complete

Handoff/open-item notes

Tier 1 portion completed at 11:04 AM. Ticket status: escalated to Compliance Officer, pending determination. Tier 1 remains available to the Compliance Officer for ticket facts and timestamps only.

No open Tier 1 actions. Tier 1 did not contact channel members, recover or export content, alter audit or retention settings, restrict the channel, or give any breach, notification, or disciplinary opinion. Attachments: completed HIPAA/PHI Incident Response Checklist, Standard Warm-Transfer Summary, Clinician Communication Log.

Final Submission Check

- ☒ All six sections are complete and timestamped where applicable.
- ☒ No patient identifiers or verbatim clinical content were reproduced.
- ☒ Reaction evidence is described as confirmed interaction, not total viewership.
- ☒ No breach, notification, or channel-restriction decision was made by Tier 1.
- ☒ The standard warm-transfer summary is referenced and attached/included as required.

Warm-Transfer Summary—INC-00472

Capstone-wide escalation format with Ticket 2 supplemental compliance fields

Use this document: Use the core fields for every capstone warm transfer. Keep the summary concise, actionable, and limited to the minimum information needed by the receiving function. For Ticket 2, complete the supplemental compliance fields after the core section. Do not reproduce patient identifiers or verbatim clinical content.

CORE WARM-TRANSFER FIELDS | Use for every capstone ticket	
To	Compliance Officer (designated privacy/compliance function)
From	Tier 1 Support Technician
Ticket Number	INC-00472
Timestamp (Exact Incident Timestamps)	Message posted: 10:47 AM. Deletion confirmed: approximately 10:47:30 AM. Evidence of exposure confirmed: three reactions recorded before deletion, reported to the support line at 10:48 AM. Warm-transfer sent: 10:58 AM.
Affected User/Clinician Description	Attending Physician (reporter). Patient reference: Patient A.
Component/Incident Type	Data privacy — suspected PHI exposure in a general Teams channel
Signal/Outcome Observed	A message containing what appeared to be a patient chart note excerpt was posted to the clinic-announcements Teams channel (500+ members) at 10:47 AM; deletion confirmed at approximately 10:47:30 AM. Three reactions were recorded before deletion. Message confirmed no longer visible at 10:49 AM.
Action Required	Formal breach risk assessment and determination of required next steps, including breach status, patient notification requirements, and the channel lockdown decision. Please follow up directly with the Attending Physician, who has been told to expect contact.
TICKET 2 SUPPLEMENTAL FIELDS | Complete for suspected PHI exposure/privacy escalation	
Checklist Outcome	☐ Within SOP ☒ Outside documented SOP — Compliance Officer determination required
SOP-Fit Assessment	Not SOP-fit. Unauthorized PHI disclosure via a general communication channel is outside documented Tier 1 SOPs. Checklist completed 10:56 AM; immediate Compliance Officer warm-transfer required.
Ambiguities Flagged	☒ Breach status determination ☒ Patient notification requirements ☒ Channel restriction (channel-lockdown decision) ☒ Other: total viewership unknown
Evidence Preservation Status	☒ Relevant audit/compliance evidence preserved; no unauthorized alteration/purge actions
Known Interaction Evidence	Three reactions recorded on the message before deletion, as reported by the Attending Physician. Total viewership is unknown and is not stated or inferred.

SUMMARY BODY | Use only when additional context is necessary

Anonymized incident description

At 10:47 AM the Attending Physician, intending to post a schedule-change notice, pasted clipboard content into the clinic-announcements Teams channel. The content was what appeared to be a patient chart note excerpt relating to Patient A. She deleted it at approximately 10:47:30 AM and called the support line at 10:48 AM.

Tier 1 confirmed at 10:49 AM that the message is no longer visible and at 10:51 AM that the Teams audit log for the channel is intact and unmodified. Tier 1 has not contacted channel members, retrieved or exported the deleted content, changed retention or purge settings, or restricted the channel.

Flagged for Compliance Officer judgment: breach status determination, patient notification requirements, and channel lockdown decision. Sent via the Compliance Officer urgent escalation queue; no chart content, patient identifier, MRN, or DOB appears in this summary, its subject line, or any accompanying message.

Pre-Send Check

- ☒ Receiving team/function is specific and correct.
- ☒ Timestamp and ticket number are present.
- ☒ Role labels are used where required; no unnecessary patient/provider identifiers are included.
- ☒ Observed signal is factual and does not infer total viewership or breach status.
- ☒ Action Required asks the receiving function for a specific next step.
- ☒ No verbatim chart content, MRN, DOB, or patient name is included.
- ☒ Ticket 2 supplemental fields are complete when this is a privacy/compliance escalation.

Clinician Communication Log—INC-00472

Data Privacy/Urgent Escalation—PHI in a Public Teams Channel

Ticket Number	INC-00472
Priority	Urgent
Clinician role	Attending Physician
Patient reference	Patient A
Logged by	Tier 1 Support Technician
Communication channel	Support line (phone) — one continuous call, 10:48 AM to 11:02 AM
Ticket status at close of call	Escalated to Compliance Officer—pending determination

COMMUNICATION LOG | Timestamped contact with the Attending Physician		
10:48 AM	**Call received**	The Attending Physician called the support line to report that at 10:47 AM she had pasted clipboard content — what appeared to be a patient chart note excerpt — into the clinic-announcements Teams channel instead of a schedule-change notice, and deleted it within approximately 30 seconds. She reported that at least three reactions had been recorded. Tier 1 thanked her for calling straight away, asked her to stay on the line, and asked her not to re-open, re-paste, or describe the content.
10:49 AM	**Containment confirmation**	Told her that Tier 1 had confirmed the message is no longer visible in the channel.
10:53 AM	**Process explanation**	Explained that this type of incident is handled by the Compliance Officer, and that Tier 1 was documenting the incident and preparing the hand-off while she held.
11:00 AM	**Scope-appropriate update**	Confirmed that immediate containment steps are complete: the message is no longer visible and the audit evidence has been preserved. Confirmed that the warm-transfer to the Compliance Officer is in progress under INC-00472 (summary sent 10:58 AM). Told her the Compliance Officer will follow up with her directly, and that until then she does not need to contact channel members, re-post the content, or take further action in the channel.
11:02 AM	**Call closed**	She confirmed she understood the next step. Questions about what happens next were referred to the Compliance Officer. Call ended.

UPDATE AS DELIVERED | 11:00 AM

"Thank you for calling as soon as you noticed — that was the right thing to do, and I know this is stressful. I've confirmed the message is no longer visible in the channel, and the records the compliance team will need have been preserved.

I've passed this to our Compliance Officer under ticket INC-00472, and that hand-off is in progress now. The Compliance Officer will contact you directly about next steps. In the meantime there is nothing further you need to do in the channel; please don't re-post or forward the content or contact channel members about it.

I'm not able to tell you how this will be assessed or what will happen next — that is the Compliance Officer's decision, not mine — but they have everything from our side."

Scope Confirmation

☒ Containment update given.
☒ Compliance Officer warm-transfer and direct follow-up explained.
☒ No opinion given on breach status, disciplinary outcomes, or organizational response.
☒ No promises made about outcomes outside Tier 1 control.
☒ The Attending Physician was not asked to re-open or reproduce the content.
☒ No patient name, MRN, DOB, or verbatim or paraphrased chart content appears in this log.
