TICKET 1 RESOLUTION

Identity and Access: New User Provisioning

Ticket Number:	TKT-001
Categorization Label:	Identity and Access — New User Provisioning
Priority:	Standard
Submitter:	Nursing Manager Torres, Med/Surg Unit
Target User:	New Registered Nurse (Med/Surg) — Emma Chen, RN; start date Monday, 11/16/2026
Required Completion:	Sunday evening before Monday shift start

COMPONENT 1 — Microsoft 365 Account Creation

Procedural Steps Followed:

1. Signed in to Microsoft 365 Admin Center (admin.microsoft.com) using Tier 1 admin credentials. [Friday, 11/13/2026, 03:58 PM]

2. Created a new user account with display name Emma Chen and UPN emma.chen@stregional.org, following the organizational naming convention (firstname.lastname@stregional.org; display name format Firstname Lastname). [Friday, 11/13/2026, 04:03 PM]

3. Assigned the Microsoft 365 E3 Healthcare license SKU (M365_E3_HEALTHCARE) for clinical staff per tenant standard; seat availability confirmed before assignment. [Friday, 11/13/2026, 04:05 PM]

4. Generated initial temporary credentials per organizational password policy and communicated directly to Nursing Manager Torres via the secure onboarding portal (encrypted note) — not to the new hire, and not in the ticket body, chat, or email. [Friday, 11/13/2026, 04:10 PM]

5. Verified mailbox provisioning status in the Mail settings tab; mailbox active 9 minutes after license assignment, inside the 15-minute expected window. [Friday, 11/13/2026, 04:14 PM]

Verification & Operational Log:

Timestamps:	• Account Created & License Assigned: Friday, 11/13/2026, 04:05 PM • Temporary Credentials Sent: Friday, 11/13/2026, 04:10 PM • Mailbox Active Status Confirmed: Friday, 11/13/2026, 04:14 PM
Evidence Captured:	Screenshots attached to ticket, one per sub-step: TKT-001_C1a_UserCreated.png (Active users record showing display name Emma Chen, UPN emma.chen@stregional.org, sign-in allowed); TKT-001_C1b_License.png (Licenses and apps tab showing Microsoft 365 E3 Healthcare / M365_E3_HEALTHCARE assigned); TKT-001_C1c_CredentialSent.png (secure onboarding portal delivery confirmation to Nursing Manager Torres, password value not visible); TKT-001_C1d_Mailbox.png (Mail tab showing Exchange Online

	mailbox provisioned). Temporary password is not recorded in this ticket; it was sent only to Nursing Manager Torres via the secure onboarding portal, with change-at-first-sign-in enforced.
Anomalies Observed:	None observed. License seat was available; UPN format was unambiguous; mailbox provisioned 9 minutes after license assignment (within the 15-minute window).
Escalation Trigger Fired:	No

COMPONENT 2 — Intune Profile Assignment

Procedural Steps Followed:

1. Opened Microsoft Intune Admin Center (intune.microsoft.com) and navigated to Devices > All Devices. [Friday, 11/13/2026, 04:18 PM]

2. Searched and located the assigned workstation record; verified Windows Autopilot enrollment completion status (enrollment already complete; wait time 0 minutes against the 15-minute timeout window). [Friday, 11/13/2026, 04:22 PM]

3. Assigned the existing Med/Surg Workstation Compliance Profile (WIN11-CLINICAL-MEDSURG-COMPLIANCE), which the role-to-profile mapping table lists for Med/Surg Unit RN; no profile was created or modified. [Friday, 11/13/2026, 04:25 PM]

4. Ran a manual device Sync and verified that the device state updated to Compliant. [Friday, 11/13/2026, 04:31 PM]

Verification & Operational Log:

Timestamps:	• Autopilot Enrollment Verified: Friday, 11/13/2026, 04:22 PM • Profile Assigned & Compliance Verified: Friday, 11/13/2026, 04:31 PM
Evidence Captured:	Screenshots attached to ticket: TKT-001_C2a_Autopilot.png (Intune device record for the assigned Med/Surg workstation showing Autopilot enrollment complete); TKT-001_C2b_Compliant.png (Device compliance showing the Med/Surg Workstation Compliance Profile / WIN11-CLINICAL-MEDSURG-COMPLIANCE assigned and Compliance state = Compliant).
Anomalies Observed:	None observed. Device was listed in Intune, Autopilot enrollment was already complete (no wait), and the profile applied cleanly; state evaluated to Compliant 6 minutes after assignment.
Escalation Trigger Fired:	No

COMPONENT 3 — Epic Provider Security Group Membership

Procedural Steps Followed:

1. Opened Microsoft Entra ID Admin Center (entra.microsoft.com) and navigated to Groups. [Friday, 11/13/2026, 04:34 PM]

2. Searched for and verified the RN-Med-Surg group definition against the Epic Provider Security Group Integration Matrix: existing cloud security group, Object ID beginning 2f9a0c2d-7b2b-4c8e-bf6b-3e2a, mapped to the downstream Epic RN-Med-Surg Providers group for Registered Nurse (Med/Surg). Definition matched; nothing was changed. [Friday, 11/13/2026, 04:36 PM]

3. Added the account (emma.chen@stregional.org) to the RN-Med-Surg Entra ID group as a member. [Friday, 11/13/2026, 04:38 PM]

4. Monitored downstream synchronization window feeding the Epic RN-Med-Surg Providers security group; propagation confirmed 8 minutes after the add, inside the 10-minute standard sync window. [Friday, 11/13/2026, 04:46 PM]

Verification & Operational Log:

Timestamps:	• Group Verified & Account Added: Friday, 11/13/2026, 04:38 PM • Epic Downstream Sync Status Checked: Friday, 11/13/2026, 04:46 PM
Evidence Captured:	Screenshots attached to ticket: TKT-001_C3a_GroupDefinition.png (Entra ID > Groups > RN-Med-Surg overview showing group name, type and Object ID matching the integration matrix); TKT-001_C3b_Members.png (Members list showing emma.chen@stregional.org as a direct member); TKT-001_C3c_Sync.png (downstream sync status showing the membership propagated to Epic RN-Med-Surg Providers).
Sync Status:	Confirmed as of Friday, 11/13/2026, 04:46 PM — membership propagated to Epic RN-Med-Surg Providers 8 minutes after the add (standard window: 10 minutes)
Anomalies Observed:	None observed. Group existed, definition matched the reference set, and downstream sync completed within the 10-minute standard window.
Escalation Trigger Fired:	No

COMPONENT 4 — Next-Shift Handoff Documentation

Completed Items with Timestamps:

• Component 1: M365 Account created, E3 Healthcare license assigned, mailbox confirmed, temporary credential communicated to Nursing Manager Torres via the secure onboarding portal at Friday, 11/13/2026, 04:10 PM (account created and licensed 04:05 PM; mailbox confirmed 04:14 PM).

• Component 2: Intune Med/Surg compliance profile assigned, device compliant state confirmed at Friday, 11/13/2026, 04:31 PM.

• Component 3: Entra ID RN-Med-Surg group membership added at Friday, 11/13/2026, 04:38 PM; Epic downstream sync status confirmed at Friday, 11/13/2026, 04:46 PM.

Open Items for Incoming Shift:

• Verify Monday morning (11/16/2026) first-time sign-in for New RN – Med/Surg at shift start: temporary credential change completes, mailbox opens, the Med/Surg workstation still shows Compliant, and Epic opens with RN-Med-Surg provider access. No other items open.

Anomalies Flagged:

• None observed. No license seat, mailbox, Autopilot, compliance, or Entra ID-to-Epic sync delays; Components 1–3 each completed inside the documented window. No escalation trigger fired and no warm

transfer was required. Handoff note completed Friday, 11/13/2026, 05:00 PM, ahead of the Sunday evening deadline.

RATIONALE

This ticket was resolved entirely within Tier 1 scope by following the documented procedures and reference set for Identity and Access — New User Provisioning: an account built to the UPN and licensing standard, an existing Intune compliance profile assigned from the role-mapping table, and an approved account added to an existing Entra ID group, with no roles, profiles, or group definitions created or modified. Each escalation trigger was checked and confirmed absent — UPN format clear, E3 Healthcare seat available, mailbox active in 9 of 15 minutes (Identity Administrator); device listed, Autopilot complete, profile applied cleanly (Endpoint Administrator); RN-Med-Surg group present, definition matched, sync confirmed in 8 of 10 minutes (Epic Analyst) — so no warm transfer was required. Credential and data-minimization discipline was applied throughout: the temporary password went only to Nursing Manager Torres through the secure onboarding portal and never into the ticket, every sub-step was timestamped with screenshot evidence, and the handoff note uses the role label “New RN – Med/Surg” rather than personal details.

WARM-TRANSFER SUMMARY (IF ESCALATION TRIGGER FIRED)

Note: Fill out this section only if an escalation trigger was encountered (e.g., license depletion, missing Entra ID group, Autopilot failure). NOT APPLICABLE for TKT-001 — no escalation trigger fired in Components 1–3.

Receiving Team:	N/A — no transfer required
Sender:	Tier 1 Support Tech
Ticket Number:	TKT-001
Exact Timestamp:	N/A
Role-Label Description:	New RN – Med/Surg
Observed Signal/Outcome:	N/A — no escalation signal observed
Action Required:	N/A — none
