Career Readiness Portfolio Brief

A fillable, evidence-led template for Tier 1 healthcare IT career preparation

FILLABLE TEMPLATE

Build one coherent career narrative

Target roles + resume evidence + portfolio cases + interview story

USE OF THIS TEMPLATE

Complete all four sections using your own authorized evidence. Label simulated work clearly. Do not paste real tickets, patient information, credentials, confidential logs, or production screenshots.

1 Document identity

Complete before drafting

CANDIDATE NAME

PRIMARY TARGET ROLE

LOCATION / TARGET MARKET

PORTFOLIO VERSION DATE

2 Recommended section targets

Assessment guidance, not hiring-industry limits

SECTION 1	Target roles and sourcing	150-175 words
SECTION 2	Resume evidence	150-175 words
SECTION 3	Portfolio brief	250-275 words
SECTION 4	STAR answer	175-230 words

PRIVACY-SAFE CAREER DOCUMENT STANDARD

Career materials must not contain real patient information. In simulated examples, use role labels such as 'clinical staff member' or 'provider'. Fictional identifiers are not automatically PHI, but this program requires role labels to remove ambiguity and reinforce minimum-necessary habits.

Section 1: Target Roles and Sourcing Plan

Three-week sourcing sprint for generating evidence and refining search decisions

SECTION 1

PLANNING HORIZON

Three weeks is an initial data-gathering sprint, not a promised job-search duration. Review results weekly and continue, broaden, or narrow the plan based on evidence.

1 Target-role decisions

Name a primary role and realistic adjacent roles

ROLE	PRIMARY OR STRETCH	WHY THIS FITS MY EVIDENCE
ROLE 1	PRIMARY OR STRETCH	WHY THIS FITS MY EVIDENCE
ROLE 2	PRIMARY OR STRETCH	WHY THIS FITS MY EVIDENCE
ROLE 3	PRIMARY OR STRETCH	WHY THIS FITS MY EVIDENCE

2 Employer and channel plan

Use active sources; verify every posting on the employer site

TARGET ORGANIZATION OR TYPE	EMPLOYER CAREER-PAGE URL	SEARCH TERMS / ALERT	CADENCE

3 Three-week experiment

Track quality and learning, not just application volume

WEEK 1 - BASELINE SEARCHES AND ROLE-TITLE TEST

WEEK 2 - REFINE KEYWORDS AND TARGET EMPLOYERS

WEEK 3 - REVIEW SIGNALS, FOLLOW UP WHERE APPROPRIATE, AND ADJUST

Section 2: Resume Evidence

Evidence-led content for an early-career healthcare IT resume

SECTION 2

CLAIM STANDARD

State environment, authorization, action, evidence, and outcome. Do not convert simulated training into production employment or claim administrator authority you did not hold.

1 Professional summary

Target role + evidence + healthcare context | 2-3 lines

2 Project or experience block

Use action + evidence + disposition

PROJECT / ROLE TITLE

DATE OR PROGRAM PERIOD

CONTEXT LINE - INCLUDE 'SIMULATED' WHERE APPLICABLE

EVIDENCE BULLETS - INCLUDE RESOLVED AND ESCALATED OUTCOMES

3 Skill groupings

Use only skills supported by your evidence

ENDPOINT AND MICROSOFT 365 SUPPORT

SERVICE DESK AND DOCUMENTATION

EHR AND CLINICAL APPLICATION SUPPORT

PRIVACY, SECURITY, AND ESCALATION

Section 3: Help Desk Resolution Portfolio Brief

SECTION 3

Three simulated Tier 1 case records with evidence, boundaries, and outcomes

1 Situation framing

Environment + content + Tier 1 scope

2 Ticket summaries

Category + authorized action + outcome or escalation

TICKET 1 - CATEGORY / TITLE

SUMMARY - INCLUDE EVIDENCE, SCOPE, DISPOSITION, AND RECEIVING FUNCTION WHERE APPLICABLE

TICKET 2 - CATEGORY / TITLE

SUMMARY - INCLUDE EVIDENCE, SCOPE, DISPOSITION, AND RECEIVING FUNCTION WHERE APPLICABLE

TICKET 3 - CATEGORY / TITLE

SUMMARY - INCLUDE EVIDENCE, SCOPE, DISPOSITION, AND RECEIVING FUNCTION WHERE APPLICABLE

3 Technical disciplines and readiness signals

Make observable behavior explicit

TECHNICAL DISCIPLINES DEMONSTRATED

CAREER READINESS SIGNALS

OUTCOME RULE

Resolved, Pending, or Escalated are all valid when the evidence supports the disposition.

Section 4: Behavioral Interview Answer

Use STAR for one specific, clearly disclosed ticket or training scenario

SECTION 4

WRITTEN PRACTICE TARGET

Target 175-230 words for this activity. This is not a universal live-interview limit. Adapt to the prompt and give most detail to the Action and verified Result.

INTERVIEW QUESTION

S **SITUATION** — Context, exact symptom, environment, and why it mattered

T **TASK** — Your assigned responsibility, authorization, and stop condition

A **ACTION** — Your approved checks, reasoning, communication, documentation, and escalation

R **RESULT** — Verified outcome, disposition, ownership confirmation, and one learning

SIMULATION / EMPLOYMENT DISCLOSURE

Final Quality Gate and Submission Record

Complete every check before exporting the final PDF

FINAL REVIEW

1 Evidence integrity

Required

- [ ] Every simulated activity is labeled as simulated or training-based.
- [ ] No real patient information, credentials, confidential logs, or production screenshots are included.
- [ ] Every technical claim stays within the authorization and role described.
- [ ] Artifacts are cited by safe reference, not copied as sensitive content.
- [ ] Each case has an evidence-supported disposition: Resolved, Pending, or Escalated.
- [ ] Every escalation names the receiving function and ownership confirmation where available.

2 Narrative coherence

Required

- [ ] Target roles match the resume and portfolio evidence.
- [ ] Resume claims point to artifacts described in the portfolio brief.
- [ ] The STAR answer uses evidence consistent with the portfolio.
- [ ] Sourcing channels are current, active, and appropriate for the target market.

3 Final submission record

Complete after export
